

INDUSTRIAL HEMP SUMMARY

About cannabis

1. One hectare of cannabis releases as much oxygen as 25 hectares of forest.
2. You can get the same amount of paper from one hectare of cannabis as from 4 hectares of wood.
3. While hemp makes paper 8 times (recycled), wood makes paper 3 times. Hemp paper is the best and durable.
4. Hemp grows in 4 months, and a tree grows in 20-50 years.
5. Hemp flower is a real radiation trap. Cannabis plantations clean the air.
6. Hemp can be grown anywhere in the world, it needs very little water. Besides, since it can defend itself against pesticides, it does not need pesticides.
7. Hemp textiles surpass even linen products in their properties.
8. Hemp is an ideal plant for the production of ropes, ropes, cords, bags, shoes and headwear.
